

PINNACLE 100

24V IP69 Submersible Tape Light

NDR Pinnacle 100 Series IP69 Submersible LED tape light offers a market-leading design with countless color options comprised of RGB and 3000K white. Its durable, weather-proof IP69 PVC extrusion and 20ft wire lead with water-block makes it

the perfect option for dock lighting installations. The TL100 tape is specifically designed to withstand the changing weather elements and for any submersible applications. Offered in a 16.4' reel for lighting along the walkways of marinas/docks or in a

30" reel designed to wrap around 8-10" dock pilings. The matte treatment provides a smooth and consistent color and brightness light output.

IP69
SUBMERSIBLE

Suitable for salt water, fresh water and swimming pools

Ideal applications: Dock Lighting, Swimming Pools, Waterfalls, and accent lighting exposed to water.

16.4' | **4.6** | **105** | **IP69**
