

EAGLE | LED UNIVERSAL HIGH BAY

The Eagle series offers a stylish high bay lighting design, combined with high light output and low energy costs.

Added to this high-performance unit, is the ability to configure the luminaire lumen output to the application needed. In other words, by simply rotating the selector knob located on the outside of the unit, the user may select a range from 2,100 to 25,000 lumens.

One universal high bay luminaire for multiple applications! Stylishly designed for commercial, retail, office space, warehousing, manufacturing or any large indoor spaces that require high levels of lighting.

FEATURES

- Universal voltage 120 – 347V
- Adjustable lumens from 1,250 to 25,000
- 10-step field adjustable knob
- 150+ Lumens per watt
- Elegant look with easy install
