General notes:

NDR Lighting has tested each of the products above with the dimmers listed. All dimmers have performed in accordance to our guidelines and normal conditions. However each installation has its unique factors such as loads, common neutrals and other electrical products on the same circuit on line. These factors may create an environment where the NDR Lighting product encounters performance related issues.

NDR Lighting recommends that ONLY dimmers which are rated for use with LED type products (recessed or bulbs) be installed with NDR Lighting branded products. Carefully read and follow the manufacturer's installation instructions regarding dimmer installation.
